Integration of Court Technology in court process & procedures

NJA Bhopal

- *Automation and advantages*

- *Limitations of human mind and fallacy of comparisons*

- *Humans are individuals*

- *It is difficult to connect one another*

- *Humans are to be replaced by integrated network*

- *Abilities of of an integrated network to reckon*

- *Utility is the focus*

- Most difficult for human mind- predicting unpredictability
- Necessity and response
- Reading past and experience in past.

Black swan attributes
It is an outlier...outside the realm of regular expectations
It carries an extreme impact
Inspire of its outlier status ,human nature making it explainable and predictable

- Multi Stakeholder and institutional structure
- Boundaries between different section are artificials and some time become counter productive
- Necessary to remove barriers by engaging power of networks and to create effective partnership
- Institutional structure of technology implementation

- Managing data in the context of declaration of privacy as the fundamental right
- Frontiers of morality and ethics
- Controlling AI
- AI Controlling human
- Dilemma of data dissemination in social media

- New dimension to access to justice
- Role of AI in creating inclusive society
- Empowering and dissolving inequality
- Integrating legal service authority to the mainstream judicial domain.

Court Management System

High Court of Kerala
